Brief writeup about CARE

Chettinad Academy of Research and Education (CARE) was conferred the status of Deemed to be University in 2008. The University has been accredited with grade "A" by NAAC. The University offers academic programs under Faculty of Medicine, Allied Health Sciences and Nursing from undergraduate to post doctoral level. Innovative academic programs offered at CARE in the emerging areas interface two or more disciplines. These programs, implemented under choice based credit system, are integrated with research projects that engage students in discovery through research, potential of employment for students in industry are established. Research at CARE is devoted to excellence in medical, nursing and interdisciplinary fields towards translational research in medicine.

Holistic growth of the young minds is achieved not only through academics but through extracurricular activities like sports, arts and NSS activities.

Being situated in a semi urban area CARE offers Quality health care to the needy poor in this part of the state. Through its outreach and consultancy programs the health care offered by the institute has made an impact on the general population.

CARE pursues to serve the regional and national needs justifying its goal Educate, Enlighten and Empower.

About the Conference

Realizing the need for improving the standards of the rapidly transforming global scenario in higher education and to align, NAAC has revised the assessment and accreditation methodology for health sciences institution recently. In order to debate and deliberate on the revised guidelines formed by NAAC, Chettinad Academy of Research and Education is organizing a National Conference on the Quality indicators and benchmarks for health science institutions, with the

academic support of NAAC. This conference is being organized to impress upon the new A & A methodology, need for benchmarking and identify quantitative measures. Experts from NAAC and across the country would deliver invited lectures and debate in the panel discussion. In addition to active participation and sharing of inputs in the sessions, there will be free paper presentations from the participating institutions to showcase their best practices or specific topics as per the subthemes of the conference.

We hope the deliberations in the 2 day conference would provide ample information and opportunities to the delegates enabling them understand the concept of benchmarking and monitoring relevant indicators in addition to promoting active staff involvement. On a long term perspective and beyond accreditation we hope all the participating institutions internalize and promote quality benchmarks beyond accreditation resulting in quality health care education and delivery in our country.

Sub Themes

- Highlight on NAAC's revised accreditation framework pertaining to health science institution
- Indicators and quality benchmark in international quality assurance frameworks
- Need for measuring and improving Quality in Health care Institutions
- Measurement of Quality in Health Care using qualitative and quantitative indicators
- Best Practices relevant to benchmarking in healthcare system and Health Sciences Institutions

- Issues in Health Care Quality - Beyond Accreditation
- Emerging Trends in building Quality and Safety in Health Care System and Health Sciences Institutions
